

Mirror Demisters

The demisters are films that help in mirror demisting, specifically in bathrooms and bathhouses. For the finishing touch on make up or hairstyle, immediately after a bath, to have a clean mirror is fundamental. Reflecting the Soluft products' quality, the mirror demisters also avoid the accumulation of moisture and mold.

Cabling upon clients needs

Design upon client specification

Maximum dimensions:
1000mm x 600mm
(standard size: 500mm x 500mm - other sizes available upon request)

55 W / 230 V - 50 Hz
Voltage supplies and powers upon request

Very homogeneous heat distribution!

Availability of many types of **thermal protections:** thermal fuses, limiters, probes and sensors

Application of **various types of self adhesive layers** to meet the clients requests

Voltage supply 110/230/240V and low safety voltage 12/24/48V

Tests carried out in accordance with EN 60335-1 and EN 50106

Construction in class II and III

Demisters

Ideal for bathrooms, especially those with inadequate ventilation.

StopVapor guarantees a crystal clear mirror surface in the area corresponding to the foil applied to the back. Easy to apply since StopVapor is self-adhesive: you just have to fix the heating foil, after removing the adhesive paper, onto the back of your mirror at the desired position. It is enough to allow a space of 1cm between the mirror and the wall to guarantee the exit of electrical supply cable.

GUARANTEE

StopVapor is covered by guarantee for 24 months from the date of purchase, for any defects due to faulty material or workmanship. The guarantee consists of the restoration of the appliance to full working order. Forwarding expenses both to and from the company premises will be charged to the purchaser. The guarantee is not valid if the defects are due to mishandling, negligence or an improper use of the appliance. Responsibility will not be taken for damages that may have been caused by improper use of the appliance.

From 29,90 €!

Minimum Temperature on mirror: 35-40°C

Construction in compliance with 2006/95/CE
